

Name: _____ Group# _____ Date: _____

Features	Archy	Arch # _____
Describe the shapes you see. List the different kinds of shapes: Squares, rectangles and other polygons. List and rounded or curved shapes.	There are many rectangular prisms, squares inside of squares as decoration and 3 archways. The columns are cylinders.	
Notice the details. Is there any writing? Are there letters or numbers? You may want to copy what you see and ask your teacher to help you identify the numbers or letters.	He is made from white marble. The main arch has two angels on either side of a lion. There are 4 columns on the front.	
How many arches do you see in the structure? Can you guess what it might have been used for?	Archy has three arches. 2 of the arches are small and the one in the middle is large. He also has a black gate in the middle like a doorway so I don't think his arch could be used by vehicles, just by people on foot.	
Make additional observations here. Anything you notice in your investigation may be the very clue you need to find Archy's Ancient Roman relation!	Archy is a fancy, decorative kind of Arch although he prefers to dress casually most of the time.
